EDUCATION

Rutgers, The State University of New Jersey — New Brunswick, NJ Expected May 2027
B.S., Double Major: Computer Science & Data Science GPA: 3.33/4.0

Relevant Coursework: Data Structures, Computer Architecture, Design & Analysis of Algorithms, Data Management for Data Science, Database Management, Machine Learning Principles, Systems Programming, Discrete Math II, Calculus III, Linear Algebra

WORK EXPERIENCE

Lockheed Martin — Rotary and Mission Systems Aug. 2026 – Present
Software Engineering Intern, ECIW · Remote

- Developed and maintained system infrastructure components within the ECIW Department, contributing to mission-critical software performance and reliability.
- Automated infrastructure services, provisioning, and network configuration using **Ansible**, PyYAML, and custom **Python** scripts to streamline deployment across many diverse systems.
- Developed Python scripts and an automated **STIG hardening** to enforce security compliance across **RHEL** and Linux systems, and authored regression testing playbooks to validate reliability.
- Deployed and managed containerized services using **Docker** and **Kubernetes**.

Lockheed Martin — Rotary and Mission Systems May – Aug. 2026
Software Engineering Intern, SEMS · King of Prussia, PA

- Programmed low-level system software in **C++** for an **Inertial Measurement Unit (IMU)** to enable accurate navigation in **GPS-denied environments**.
- Designed and coded simulations of the IMU system in **MATLAB** and **Python** to model, test, and validate performance under varied conditions.
- Collaborated with cross-functional teams on classified defense projects in a secure, compartmented environment.
- Operated in an **Agile/Scrum** environment using Jira, Confluence, and the Atlassian suite.

Rutgers Office of Career Exploration Jan. 2025 – Dec. 2026
FIGS Peer Instructor · New Brunswick, NJ

- Competitively selected to design and deliver a First-Year Interest Group Seminar on Computer Science to **25 students**.
- Led an engaging classroom environment by facilitating discussions, structuring lesson plans, and adapting teaching strategies to diverse learning styles.
- Conducted **weekly meetings** with fellow peer instructors to align curriculum and coordinate logistics, and participated in **inter-viewing** incoming instructor candidates.

PROJECTS

Terminal Bullet Chess · C++

- Engineered a two-player online bullet chess game with **TCP/IP socket** communication and a multithreaded server for real-time move validation and game synchronization.

Wordle Clone · Java

- Developed an interactive Wordle clone using **Java Swing** with dictionary validation, animated feedback, and clean object-oriented design with full unit testing coverage.

TECHNICAL SKILLS

Languages	Python, C/C++, Java, R, SQL, MATLAB, Bash, YAML
Frameworks & Tools	Docker, Kubernetes, Ansible, PyYAML, Git, GitHub, Jira, Confluence, Atlassian Suite, Jupyter, NumPy, Pandas, Matplotlib, Apache Spark, WebSockets, MySQL, PostgreSQL, Web APIs
Practices	Agile, Scrum, Containerization, Networking, Regression Testing, STIG/Security Hardening, CI/CD
Platforms	Linux, RHEL

CERTIFICATIONS & CLEARANCE

- **Active Top Secret Security Clearance** — U.S. Department of Defense

LEADERSHIP & CAMPUS INVOLVEMENT

- **USACS** — Member, Undergraduate Student Alliance of Computer Scientists, Rutgers University
- **Ocean County Ski Club** — Active member
